DETAILED ACTION***Allowable Subject Matter***

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a device having all of the limitations of claims 1 and 10. In particular, there is no disclosure or suggestion of a holder which is **fixed** in each of a plurality of recesses around the periphery of a disc of a stump grinding apparatus, where a cutter tooth is mounted in each holder, in the manner claimed. It is clear that in context, "fixed" refers to a holder which is non-removably attached to the disc. Pages 5 and 6 of the specification discloses that the holder may be welded to the disc at the walls of the recess. While stump grinding apparatuses having holders located in peripheral recesses, each of these holders is removably attachable to the disc. Bennington discloses one such example. The present invention has advantages over the prior art, in that cutter teeth may be more securely attached to the disc, while each pocket enables a user easy access to use a socket wrench to replace a cutter tooth. Figure 6 best shows the configuration of the invention. Because the invention as recited in claims 1 and 10 is not disclosed or suggested in the prior art, these claims, and all claims dependent therefrom, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Monyak, Bennington, Wilson, Clemenson, Ritchey, Leonardi, Bowling, Ziehm, Hooser, Van Zante, Ver Ploeg and McCreery discloses various stump grinding and other rotary cutting devices comprising discs having cutter teeth disposed thereon.
